GPSR Listing Check

A free short check for Etsy & Shopify sellers who ship to the EU: scope test, the 4 items every listing must show, and the 5 most common mistakes.

Inside: 2-minute scope test · Article 19 table with examples · 10-minute listing checklist · 5 common mistakes

Sources checked 12 October 2026 · Not legal advice · ProductivityKitsEU

1. Does the GPSR apply to you? (2-minute test)

Question	If yes	Source
Do you sell to buyers in the EU (or Northern Ireland), even occasionally, from anywhere?	Continue	Art. 4; online offers targeting EU consumers count
Are you selling as a business ("trader"), not as a private person clearing out your own things?	Continue	EU guidelines 1.1
Is the item a consumer product (new, used, repaired or reconditioned)?	Continue	Art. 3(1), Art. 2(3)
Is it medicine, food, feed, living plants/animals, plant protection products or an antique?	Probably outside the GPSR (other laws may apply)	Art. 2(2)
Is it covered by a specific EU law (toys, cosmetics, electrical, PPE...)?	GPSR still partly applies: listing rules (Art. 19), accident reporting, recalls	Art. 2(1)

> If your Etsy shop or Shopify store ships to EU countries, assume you are in scope. The EU looks at where you ship to, languages, payment methods and currency or domain.

2. What every listing must show (Article 19)

Item	What to write	Example (fictional)
(a) Manufacturer	Name or registered trade name/trade mark + postal address + e-mail or contact page that lets buyers reach you directly	Juniper & Clay Studio Ltd, 12 Example Street, Leeds LS1 1AA, UK, hello@juniperclay.example
(b) Responsible person	Only if the manufacturer is outside the EU: name + postal + electronic address. Show both (a) and (b)	EU Rep Example GmbH, Beispielstrasse 5, 10115 Berlin, Germany, gpsr@eurep.example
(c) Identification	Photo + product type + any identifier (model, batch, serial, GTIN/EAN)	Stoneware mug "Fern", 350 ml, model FERN, batch 2026-09
(d) Warnings / safety info	The same warnings that are on the product, packaging or leaflet, in the language(s) required where you sell	Hot drinks can scald: handle with care.

3. 10-minute listing check

Open 3 live listings in a private (logged-out) browser window and tick:

☐	Manufacturer name, postal address and e-mail/contact page are visible on the listing itself
☐	Non-EU manufacturer: the EU responsible person is shown as well, with postal and electronic address
☐	The main photo clearly shows the product
☐	Type/model/batch or another identifier appears in the title, description or fields
☐	Warnings from the label or leaflet appear on the listing
☐	Warnings are in the language of each country you actively sell to
☐	Listing data matches what is printed on the product, packaging or parcel
☐	Etsy: trader status set; 'Manufacturers' and 'Product safety info' fields filled
☐	Shopify: GPSR data shown on the product page (metafields or Disclosures), not only in shop policies

4. Five common mistakes

1. **Only a website link as the electronic address.** It must let consumers contact you directly (e-mail or a contact section).
2. **Only the responsible person, not the manufacturer.** Show both for non-EU manufacturers.
3. **Data hidden in shop policies.** Article 19 talks about "the offer": put it on each listing.
4. **English-only warnings everywhere.** Each Member State sets the language. Example: Czech law requires Czech (Act No. 387/2024 Coll., § 8(2)).
5. **Listing data that does not match the label.** Keep one source for both.

Want the full system? The **GPSR Seller Kit** adds a 19-page guide (role finder, EU responsible person, labels, risk assessment, technical file, Etsy and Shopify field mapping, 30-day plan) and two spreadsheets that build the listing text for you.
